PLO Round 1 (Senior) — 64-Problem Master Study Guide

1. Problem-type table

Across all nine source files, there are **204 total problem entries**, which reduce to **197 unique problems** after removing duplicate appearances across files:

- **The Yellow Book (Linguistics Olympiad Training Guide):** 111 problems (39 worked examples and 72 practice problems across Chapters 2–10).
- **PLO Compilation PDFs (PLO_Easy_Problems.pdf & PLO_Medium_Hard_Expert_Problems.pdf):** 77 unique problems (2014–2021 Round 1 papers plus undated regional/practice problems; 7 of these also appear in the Yellow Book: Lepcha = YB 2.8, Stressed Manobo = YB 3.2, Chickasaw Stress = YB 3.8, Basque = YB 8.3, Making Sense of Turkish Words = YB 8.4, Malagasy = YB 8.8, and Telling Time in Swahili = YB 9.8).
- **PLO 2023, 2024, and 2026 Past Paper PDFs:** 16 unique problems (6 from 2023 Junior/Senior, 5 from 2024 Senior, and 5 from 2026).

Division Breakdown of the 93 Unique PLO Problems: 75 Senior/All problems (62 from dated 2014–2021, 2023, 2024, and 2026 Round 1 papers + 13 from compilations) and **18 pure Junior problems**.

The table below ranks all problem types by their frequency in **PLO Senior/All papers (N = 75)** alongside their count across the **entire 197-problem corpus (N = 197)**, with typical difficulty and assigned Yellow Book chapter (one chapter per problem):

Problem type (and core sub-skills)	PLO Senior/All (N = 75)	Share of PLO Senior/All	Full Corpus (N = 197)	Share of Full Corpus	Typical difficulty	Yellow Book chapter
1. Number Systems, Ciphers & Time (bases 4/5/10/12/20, overcounting, subtraction, arithmetic equations, visual/alphabetic ciphers, calendars)	14	18.7%	34	17.3%	Yellow to Red (Medium to Har…	**Chapter 9**
2. Core Sentence Syntax & Alignment (SOV/SVO word order, ergative-absolutive vs. nominative-accusative, dative	12	16.0%	26	13.2%	Orange to Red (Medium-Hard t…	**Chapter 7**

Problem type (and core sub-skills)	PLO Senior/All (N = 75)	Share of PLO Senior/All	Full Corpus (N = 197)	Share of Full Corpus	Typical difficulty	Yellow Book chapter
subjects, applicatives/voice, relative clauses)						
3. Lexical Semantics, Metaphors & Vectors (compound metaphors, Graph Method, creole calques, word embeddings, brain voxels, WSD)	11	14.7%	18	9.1%	Yellow to Red (Medium to Har…	**Chapter 8**
4. Nominal Morphology & NP Structure (alienable/inalienable possession, Bantu noun classes, numeral classifiers, gender/case agreement, infixes/transfixes, derivation)	9	12.0%	26	13.2%	Light Green to Orange (Easy-…	**Chapter 5**
5. Verbal Morphology, TAM & Evidentiality (polypersonal indexing, pronoun hierarchy, TAM, witness/reportative/inferential evidentials, split ergativity)	8	10.7%	25	12.7%	Light Green to Orange (Easy-…	**Chapter 6**
6. Writing Systems & Script Decipherment (abugidas, abjads, alphabets, syllabaries, Braille, cuneiform, script phylogeny)	6	8.0%	20	10.2%	Light Green to Orange (Easy-…	**Chapter 2**
7. Formal Logic, Trees & Computational Parsing [Wildcard] (Polish notation, POS taggers, binary parse-tree encodings, prefix codes)	4	5.3%	5	2.5%	Light Green to Red (Bimodal: …	**Chapter 7**
8. Phonology & Sound Laws [Wildcard] (comparative sound correspondences, orthography-to-IPA rules, vowel harmony, nasal assimilation)	4	5.3%	20	10.2%	Light Green to Orange (Easy-…	**Chapter 4**
9. Kinship, Naming & Spatial Orientation [Wildcard] (kinship trees, patronymics, geocentric/island directional verbs)	4	5.3%	13	6.6%	Light Green to Orange (Easy-…	**Chapter 10**

Problem type (and core sub-skills)	PLO Senior/All (N = 75)	Share of PLO Senior/All	Full Corpus (N = 197)	Share of Full Corpus	Typical difficulty	Yellow Book chapter
10. Phonetics, Stress & Versification [Wildcard] (primary/secondary stress windows, syllable weight, poetic metre)	3	4.0%	10	5.1%	Orange (Medium-Hard)	**Chapter 3**
TOTAL	**75**	**100.0%**	**197**	**100.0%**	—	**Chapters 2–10**

Key Pattern-Landscape Takeaways:

1. **The "Big Three" Dominate PLO Round 1:** Combining **Morphosyntax** (Chapters 5, 6, and 7 core syntax = 9 + 8 + 12 = 29 problems, or **38.7%**), **Number Systems** (Chapter 9 = 14 problems, **18.7%**), and **Semantics** (Chapter 8 = 11 problems, **14.7%**) accounts for **72.0% (54/75)** of all Senior/All problems.
2. **One-Chapter Resolution for Boundary Problems:**
   - **Problem 6: Altai-ed up** (PLO 2020) is assigned to **Chapter 7 (Syntax)** because its primary task is full-sentence translation requiring SOV constituent ordering and differential object case marking.
   - **Problem 4: Wiradjuri** (PLO 2024) is assigned to **Chapter 6 (Verb and verb phrase)** because 10 of its 13 corpus items are pronoun+verb clauses testing verbal TAM, voice, prohibitive mood, and clitic attachment.
   - **Problem #5: Making Sense of Turkish Words** (PLO 2014 / YB 8.4) and **Problem No. 1: Basque** (PLO 2018 / YB 8.3) are assigned to **Chapter 5 (Noun and noun phrase)** because their core mechanism is segmenting productive derivational suffixes and morphophonological sandhi in nominal compounds.
   - **Problem #5: Japanese Compound Words** (PLO 2014) is assigned to **Chapter 5 (Noun and noun phrase)** because Assignment 2 tests hierarchical constituent branching ([[A B] C] vs. [A [B C]]) and coordinate vs. subordinate nominal compounding alongside Rendaku/Lyman's Law.
   - **Problem #6: Finnish** ("Finish Finnish", PLO 2015) is assigned to **Chapter 8 (Semantics)** because it is a chaos-and-order compound-matching puzzle solved via the Graph Method, with no phonological rules.
   - **Problem 5: Prussian Blue, Hungarian Red** (PLO 2019) is assigned to **Chapter 8 (Semantics)** because its core puzzle is the semantic split between biological/emotive vörös and surface piros plus metaphorical idioms.
   - **1. Akamu's Table** (PLO 2017) is assigned to **Chapter 4 (Phonology)** because, although its vocabulary consists of the numerals 1–9, the actual task is deducing regular comparative sound correspondences across five Polynesian languages (identical in structure to YB Problem 4.2 Roro).

2. The 64-problem guide, grouped by Yellow Book chapter

This expanded 64-problem master set preserves all **40 problems** from the initial guide and adds **24 new Senior/All and Yellow Book problems** (marked with **[NEW]**), giving you **51 Senior/All PLO problems** (out of the 58 total Senior/All PLO problems across Chapters 5, 6, 7, 8, and 9) plus **13 foundational Yellow Book problems**.

Chapter 9: Number systems (15 problems: #1–#15 — 9 original + 6 new)

- **Why included:** Highest return on time in PLO Round 1 (~19–21% of papers; >90% annual appearance rate). Solving the number problem first locks in 15–20 marks within 30–35 minutes.

1. **#1. Problem 9.1 (Quenya)** — Yellow Book Ch. 9 Worked Example (p. 323; Roxana Dincă, RoLO) | **Division:** All (YB) | **Difficulty:** Light Green (Easy-Medium) — *Teaches reversed digit-order parsing (units placed before tens) and phonological vowel-linking in a base-10 suffixal system.*
2. **#2. Problem 9.4 (Umbu-Ungu)** — Yellow Book Ch. 9 Worked Example (p. 332; Ksenia Gilyarova, MSK) | **Division:** All (YB) | **Difficulty:** Light Green (Easy-Medium) — *Teaches overcounting (expressing a number by how many units it has progressed toward the next multiple of the base) in a mixed base-4 / base-24 system.*
3. **#3. [NEW] Problem #4: Telling Time in Swahili** — PLO_Easy_Problems.pdf & Yellow Book Problem 9.8 (Nilai Sarda, PLO 2014 Round 1) | **Division:** All | **Difficulty:** Orange (Medium-Hard) — *Teaches offset 12-hour clock systems (where day/night cycles start at 6:00 AM/PM = hour 0, making 7:00 = saa moja 'hour 1'), fractional time (nusu 1/2, robu 1/4), and Swahili weekday numbering starting on Saturday (jumamosi).*
4. **#4. [NEW] Problem 4: Divehi Numerals** — PLO_Easy_Problems.pdf (Sesh Sadasivam, PLO 2016 Round 1) | **Division:** All | **Difficulty:** Orange (Medium-Hard) — *Teaches duodecimal (base-12 dholhas) and irregular vigesimal/decimal breaks (fassihi = 24, fanas = 50) in pre-modern Indo-Aryan counting.*
5. **#5. Cistercian Numerals** — PLO_21'_Senior_Junior.pdf & PLO_Easy_Problems.pdf (Aalok Sathe, PLO 2021 Round 1) | **Division:** All | **Difficulty:** Orange (Medium-Hard) — *Teaches 2D geometric/featural number decomposition, where a single vertical stave encodes four decimal places (units, tens, hundreds, thousands) via quadrant reflection and rotation.*
6. **#6. [NEW] Problem No. 2 (20 Points): Numbers** (Bronckhorst Numbers) — PLO_Easy_Problems.pdf (S. Burlak, PLO Compilation) | **Division:** All | **Difficulty:** Orange (Medium-Hard) — *Teaches a 16th-century positional geometric cipher where 4-digit numbers are encoded along a horizontal axis using binary-like combinations of vertical and diagonal strokes for digits 0–9.*
7. **#7. Problem #5: Duna Numerals** — PLO_Easy_Problems.pdf (Sagar Sarda & Zarana Sarda, PLO 2015 Round 1) | **Division:** Senior | **Difficulty:** Orange (Medium-Hard) — *Teaches base-14 body-part tally cycles (malura = 14) with reduplicated unit modifiers and connective suffixes (-da).*

8. **#8. [NEW] Problem 3: Mongolian** (Mongolian Phone Numbers) — PLO_26'_Senior_Junior.pdf (Deeraj Pothapragada, PLO 2026 Round 1) | **Division:** All | **Difficulty:** Orange (Medium-Hard) — *Teaches prosodic chunking and pause placement in spoken 8-digit phone numbers, where decade stems take an attributive -n suffix only when followed by a non-zero unit within the same breath group (naya = 80 vs. nayan gurav = 83).*
9. **#9. Esimbi** — PLO_21'_Senior_Junior.pdf & PLO_Easy_Problems.pdf (Mukund Choudhary & Aparna Gupte, PLO 2021 Round 1) | **Division:** All | **Difficulty:** Orange (Medium-Hard) — *Teaches cracking a vigesimal/duodecimal number system purely from constant-ratio geometric sequences and missing-operator equations without any translated base numbers.*
10. **#10. Problem 1: Jowulu** — PLO_24'_Senior.pdf (Animikha Dutta Dhar, PLO 2024 Round 1) | **Division:** Senior | **Difficulty:** Orange (Medium-Hard) — *Teaches simultaneous cryptarithmetic deduction of operators (+, −, ×, ÷, =) and multi-tier bases (5, 10, 20, and 80 yaa) across compound equations up to 200.*
11. **#11. [NEW] Problem No. 3 (20 Points): Bariai** (Bariai Squares) — PLO_Medium_Hard_Expert_Problems.pdf (D. Gerasimov, PLO Compilation) | **Division:** All | **Difficulty:** Red (Hardest) — *Teaches deducing a quinary-decimal (base-5/10) numeral system solely from unordered perfect squares (1 to 100) and verifying it via multi-digit addition.*
12. **#12. [NEW] Problem 1: Sanskrit Months** — PLO_Easy_Problems.pdf (Monojit Choudhury, PLO 2016 Round 1) | **Division:** All | **Difficulty:** Red (Hardest) — *Teaches luni-sidereal calendar spacing (mapping 12 lunar months to 27 nakṣatras) combined with Sanskrit vṛddhi vowel-strengthening derivation (i/ī → ai, u/ū → au, ṛ → ār, a → ā).*
13. **#13. 5. Aryabhat's Enigma** — PLO_Easy_Problems.pdf (Apoorva Bhagwat & Angikar Ghoshal, PLO 2017 Round 1) | **Division:** Senior | **Difficulty:** Red (Hardest) — *Teaches alphabetic place-value numeration (mapping Sanskrit varga/avarga consonants to values and vowels to powers of 100) constrained by prime-factorization clues.*
14. **#14. Problem 4: No Zeroes in Xerénte** — PLO_Easy_Problems.pdf (Mukund Choudhary, PLO 2019 Round 1) | **Division:** Senior | **Difficulty:** Red (Hardest) — *Teaches parity-based (odd/even) and subtractive numeral construction solved through algebraic inequality constraints.*
15. **#15. Problem 5: Bahinemo** — PLO_Medium_Hard_Expert_Problems.pdf & PLO_20'_Senior_Junior.pdf (Aparna Gupte, PLO 2020 Round 1) | **Division:** All | **Difficulty:** Red (Hardest) — *Teaches resolving structural ambiguity caused by pragmatic ellipsis (dropping higher-base multiplier words in a complex base-4/5/20 system) across an arithmetic sequence of multiples.*

Chapter 5: Noun and noun phrase (14 problems: #16–#29 — 9 original + 5 new)

- **Why included:** Teaches morphological segmentation and directly remedies your weak areas in **infixes**, **transfixes**, **alienable vs. inalienable possession**, **noun classes**, **classifiers**, **initial consonant mutation**, and **agreement**.

10. **#16. Problem 1: Estonian Word Forms** — PLO_Easy_Problems.pdf & PLO_20'_Senior_Junior.pdf (Antara Raaghavi Bhattacharya & Aparna Gupte, PLO 2020 Round

1) | **Division:** All | **Difficulty:** Light Green (Easy-Medium) — *Teaches paradigm-grid completion across derivational word families (action nouns -mine, abstract quality nouns -us, agent nouns -lane, and inchoative/semelfactive/frequentative verbs).*

11. **#17. Problem 5.9 (Ulwa)** — Yellow Book Ch. 5 Practice (p. 180; Peter Arkadiev, TurLom 2003) | **Division:** All (YB) | **Difficulty:** Yellow (Medium) — *Teaches prosodically conditioned infixation—inserting person/number possessive infixes (-ki-, -ma-, -ka- + -na-) before the final syllable (after the first heavy syllable) of the noun stem. (Targets weak area: infixes).*
12. **#18. Problem 5.10 (Palauan)** — Yellow Book Ch. 5 Practice (p. 181; Michael Salter, NACLO 2018) | **Division:** All (YB) | **Difficulty:** Yellow (Medium) — *Teaches semantic numeral classifiers prefixed onto numerals (human te-, time e-, non-human kl-, ordinal onge-) and unit-only attachment in numbers above 10.*
13. **#19. [NEW] Problem No. 1 (20 Points): Basque** (Daily Basque) — PLO_Easy_Problems.pdf & Yellow Book Problem 8.3 (N. Zaika, PLO Compilation) | **Division:** All | **Difficulty:** Yellow (Medium) — *Teaches nominal derivational suffixation (-gailu machine, -tegi place/building, -talde group, -kide fellow/member, -zain guardian) with stem-final consonant sandhi (ardi + talde → artalde).*
14. **#20. Problem 5.6 (Fijian)** — Yellow Book Ch. 5 Worked Example (p. 164; Viktoria Papp, UKLO 2018) | **Division:** All (YB) | **Difficulty:** Yellow (Medium) — *Teaches inalienable direct suffixation vs. three alienable relational classifiers (edible/passive-affected ke-, drinkable me-, general owned no-), plus dual/plural and inclusive/exclusive distinctions. (Targets weak area: alienable vs. inalienable possession).*
15. **#21. Problem 5.13 (Maltese)** — Yellow Book Ch. 5 Practice (p. 183; Simona Strizhevskaya, LLO 2020) | **Division:** All (YB) | **Difficulty:** Orange (Medium-Hard) — *Teaches Semitic root-and-pattern transfixes (V1C1C2V2C3 → C1V2C2C3a → C1oC2oC3) interacting with Berlin & Kay's colour hierarchy (native inflecting vs. invariable loanword colours). (Targets weak area: transfixes).*
16. **#22. [NEW] Problem 3: Luganda** — PLO_Easy_Problems.pdf (Abhishek Dedhe, PLO 2016 Round 1) | **Division:** All | **Difficulty:** Orange (Medium-Hard) — *Teaches evaluative/derivational Bantu noun-class shifts (diminutive ka-, long/tree mu-, animal n-, liquid/mass ma-) and phonological nativization of English loanwords (bulangiti, bayibuli, kalifoomu).*
17. **#23. [NEW] Problem 5.16 (Irish)** — Yellow Book Ch. 5 Practice (p. 186; Tom Payne, UKLO 2011) | **Division:** All (YB) | **Difficulty:** Orange (Medium-Hard) — *Teaches numeral-triggered initial consonant mutation (lenition b/d/g → bh/dh/gh after 2–6 vs. nasalization mb/nd/ng after 7–10) inside discontinuous vigesimal noun phrases.*
18. **#24. [NEW] Problem 5.17 (Iaai)** — Yellow Book Ch. 5 Practice (p. 186; Rujul Gandhi, APLO 2020) | **Division:** All (YB) | **Difficulty:** Orange (Medium-Hard) — *Teaches generational/sociolinguistic change in Austronesian possessive classifiers (comparing an older speaker's specialized boat/seat classifiers hoo-/tabe- against a younger speaker's generalized anyi-, plus word-order shifts across pronoun, common-noun, and proper-noun possessors).*
19. **#25. Problem #5: Japanese Compound Words** — PLO_Easy_Problems.pdf (Zarana Sarda, PLO 2014 Round 1) | **Division:** Senior | **Difficulty:** Orange (Medium-Hard) — *Teaches Rendaku*

voicing, Lyman's Law (long-distance voicing dissimilation), coordinate dvandva blocking, and hierarchical constituent branching ([[A B] C] vs. [A [B C]]) in 3-word compounds.

20. **#26. Problem 1: Nanti** — PLO_23'_Senior.pdf (Antara Raaghavi Bhattacharya, PLO 2023 Round 1) | **Division:** All (Senior version) | **Difficulty:** Orange (Medium-Hard) — *Teaches alienable vs. inalienable possession combined with root-initial consonant voicing sandhi (p/t/k → b/d/g), phonologically conditioned alienable suffixes (-ne vs. -te), and cultural shift from inalienable to alienable (kipatsi 'land'). (Targets weak area: alienable vs. inalienable possession).*
21. **#27. Problem 5: When it clicks...** — PLO_24'_Senior.pdf (Xhosa; Druhan Rajiv Shah, PLO 2024 Round 1) | **Division:** Senior | **Difficulty:** Orange (Medium-Hard) — *Teaches Bantu noun class prefixes across singular/plural/abstract pairs (um-/aba-, um-/imi-, ili-/ama-, isi-/izi-, ubu-, uku-) and alliterative concordial agreement on numerals.*
22. **#28. Problem 2: Romanian** — PLO_23'_Senior.pdf (Vlad A. Neacşu, PLO 2023 Round 1) | **Division:** All | **Difficulty:** Orange (Medium-Hard) — *Teaches second-position enclitic definite/genitive inflection, where fronting an adjective (Noun-Def Adj → Adj-Def Noun) shifts the case/number/gender article onto the adjective, paired with cross-referencing genitive markers (al/a/ai/ale).*
23. **#29. [NEW] Problem #5: Making Sense of Turkish Words** — PLO_Easy_Problems.pdf & Yellow Book Problem 8.4 (Monojit Choudhury, PLO 2014 Round 1) | **Division:** All | **Difficulty:** Red (Hardest) — *Teaches recursive agglutinative derivational suffix chains (-lIk, -cI, -lI, -lA-, -mAk) governed by 2-way and 4-way Turkic vowel harmony alongside weekday compounding (-ertesi 'after').*

Chapter 6: Verb and verb phrase (11 problems: #30–#40 — 9 original + 2 new)

- **Why included:** Teaches how to segment complex verb complexes and directly remedies your weak areas in **TAM**, **evidentiality**, **pronoun hierarchy**, **stative verb vs. adjective categories**, and **verb-level split ergativity**.

19. **#30. [NEW] Problem no 1. Sudanese Arabic** (Hebrew Pronouns Sr.) — PLO_Easy_Problems.pdf (PLO Compilation) | **Division:** Senior | **Difficulty:** Mint Green (Easiest) — *Teaches unstressed high-vowel syncope in Semitic verb stems (sirib + -at → sirbat vs. hamal + -at → hamalat) and suffix vowel lengthening before attached object enclitics (hamalti → hamaltiiha).*
20. **#31. Problem 6.2 (Dabida)** — Yellow Book Ch. 6 Worked Example (p. 209; Ksenia Gilyarova, TurLom 2006) | **Division:** All (YB) | **Difficulty:** Light Green (Easy-Medium) — *Teaches 2D subject-by-object frequency-matrix deduction in chaos-and-order verb sets, plus valency-reducing reciprocal/intransitive suffixes (-na) that shift transitive verb meanings.*
21. **#32. Problem No. 4 (25 Points): Tiwa** (Tiwa's sentences) — PLO_Easy_Problems.pdf (P. Arkadiev, PLO Compilation) | **Division:** All | **Difficulty:** Light Green (Easy-Medium) — *Teaches polysynthetic noun incorporation and portmanteau prefixation, where the possessed direct object noun root is incorporated directly inside the verb between the portmanteau Subject+Possessor+Object-Number prefix and the verb stem.*

22. **#33. [NEW] Problem no 4. Tangkhul Adjectives** — PLO_Easy_Problems.pdf (PLO Compilation) | **Division:** Senior | **Difficulty:** Yellow (Medium) — *Teaches stative verbs functioning as adjectives—showing how Tibeto-Burman property roots take the nominalizer prefix ka- when used attributively before a noun (kachuia shinaao 'tall woman'), but drop ka- and take verbal TAM suffixes when used predicatively (chuia 'is tall', chuira 'will be tall'). (Targets weak area: TAM & verb/adjective categories).*
23. **#34. Problem no 3. Tangkhul Verbs** (Akham goes Shopping) — PLO_Medium_Hard_Expert_Problems.pdf (PLO Compilation) | **Division:** All | **Difficulty:** Yellow (Medium) — *Teaches agglutinative TAM and modal suffix stacking—combining habitual (-ya), future (-ra), and perfective (hayra) markers with desiderative (-ngaaya 'want to'), potential (-shap- 'can'), hortative (-ka), and circumfixal negation (ma-...-mara/-mana). (Targets weak area: TAM).*
24. **#35. Problem 6.3 (Ge'ez)** — Yellow Book Ch. 6 Worked Example (p. 216; Peter Arkadiev, TurLom 2007) | **Division:** All (YB) | **Difficulty:** Yellow (Medium) — *Teaches segmenting fused/conditioned V-S-O suffix chains where attaching a 3rd-person object suffix triggers vowel deletion (-a → ∅) or glide insertion (-u → -əw-) on the subject marker.*
25. **#36. Problem 6.5 (Proto-Algonquian)** — Yellow Book Ch. 6 Worked Example (p. 224; Heather Newell) | **Division:** All (YB) | **Difficulty:** Yellow (Medium) — *Teaches Pronoun Hierarchy (2 > 1 > 3) and Direct vs. Inverse verb marking, where the prefix slot always indexes whichever argument ranks higher on the person hierarchy and a theme sign marks whether the action is direct or inverse. (Targets weak area: pronoun hierarchy).*
26. **#37. Problem #4: Turkish News and Conversations** — PLO_Easy_Problems.pdf (Yash Sinha & Atınç Çağan Şengül, PLO 2015 Round 1) | **Division:** All | **Difficulty:** Orange (Medium-Hard) — *Teaches witnessed (-dI) vs. reportative/inferential (-mIş) evidentiality applied to discourse forensics (determining which of two news reports is primary vs. secondary). (Targets weak area: evidentiality).*
27. **#38. Problem #5: Pashto** — PLO_Easy_Problems.pdf (Apoorva Bhagwat, PLO 2015 Round 1) | **Division:** All | **Difficulty:** Orange (Medium-Hard) — *Teaches aspect-conditioned split ergativity on verb agreement—imperfective verbs (present/past progressive) agree with the Subject, whereas perfective/past verbs agree in gender and number with the Object. (Targets weak areas: split ergativity & TAM).*
28. **#39. 3. The Matses Hunter Boy** — PLO_Easy_Problems.pdf (Abhishek Dedhe, PLO 2017 Round 1) | **Division:** Senior | **Difficulty:** Orange (Medium-Hard) — *Teaches double-timed evidentiality—verbal suffixes that simultaneously encode how an event was inferred (-ak recent result vs. -nëdak old result) AND two independent time intervals (time between the event and discovery vs. time between discovery and reporting). (Targets weak areas: evidentiality & TAM).*
29. **#40. Problem 4: Wiradjuri** — PLO_24'_Senior.pdf (Anshul Bhagwat, PLO 2024 Round 1) | **Division:** Senior | **Difficulty:** Orange (Medium-Hard) — *Teaches noun-vs.-pronoun split ergativity combined with complex modal/voice verb morphology (counterfactual deontic 'should have', jussive 'let', passive, iterative -lali 'again', and negative permissive -mambia) plus second-position enclitic pronouns (-dyu, -nga). (Targets weak areas: TAM & split alignment).*

Chapter 7: Syntax (14 problems: #41–#54 — 8 original + 6 new)

- **Why included:** Sentence translation and formal syntax represent the single largest share of Senior PLO marks (~21% alone, ~39% combined with Chapters 5–6). Directly remedies your weak area in **morphosyntactic alignment** while covering Senior computational/logic wildcards.

28. **#41. [NEW] Problem 1: Brill's Tagger** — PLO_Medium_Hard_Expert_Problems.pdf (Monojit Choudhury, PLO 2019 Round 1) | **Division:** All | **Difficulty:** Light Green (Easy-Medium) — *Teaches transformation-based computational POS tagging—tracking ordered context-sensitive rewrite rules (WDPREVTAG, WDNEXTTAG) across sequential passes.*
29. **#42. [NEW] A Polished Weather Forecast** — PLO_Medium_Hard_Expert_Problems.pdf & PLO_21'_Senior_Junior.pdf (Ishan Ganguly, PLO 2021 Round 1) | **Division:** All | **Difficulty:** Light Green (Easy-Medium) — *Teaches Łukasiewicz (Polish) prefix logic notation (operators A disjunction, K conjunction, C implication, N negation preceding their operands without parentheses) and De Morgan equivalences.*
30. **#43. Problem 7.2 (Morphosyntactic alignments)** — Yellow Book Ch. 7 Worked Example (p. 269; Vlad A. Neacşu) | **Division:** All (YB) | **Difficulty:** Yellow (Medium) — *Teaches the complete diagnostic method for distinguishing Nominative-Accusative, Ergative-Absolutive, Tripartite, Direct, and Transitive alignments across intransitive (S) and transitive (A, O) clauses. (Targets weak area: morphosyntactic alignment).*
31. **#44. [NEW] Problem No. 5 (15 Points): Amharic** (Not Amharic) — PLO_Easy_Problems.pdf (M. Bulakh, PLO Compilation) | **Division:** All | **Difficulty:** Yellow (Medium) — *Teaches Semitic SOV syntax with circumfixal negation (a-...-m), dropping of the affirmative tense/agreement auxiliary (-all-) in negative clauses, contrastive coordination (X ənği Y 'X, not Y'), and instrumental prefixation (bä-).*
32. **#45. [NEW] 3. Kurmali** — PLO_Easy_Problems.pdf (Bornini Lahiri, PLO 2018 Round 1) | **Division:** All | **Difficulty:** Yellow (Medium) — *Teaches Differential Object Marking (ke) and double (Subject + Object/Definiteness) verb agreement in Eastern Indo-Aryan SOV clauses, plus addressee gender agreement in the 2nd person.*
33. **#46. [NEW] Kholosi** — PLO_21'_Senior_Junior.pdf & PLO_Easy_Problems.pdf (Aryaman Arora, PLO 2021 Round 1) | **Division:** All | **Difficulty:** Yellow (Medium) — *Teaches chaos-and-order SOV sentence decoding with pronominal possessive/ergative enclitics (-s, -y, -n), object postposition ke vs. instrumental postposition te, and modal ability constructions (segaw ... pesaiya).*
34. **#47. [NEW] Problem 7: Evoke Kove** — PLO_Easy_Problems.pdf (Rujul Gandhi, PLO 2019 Round 1) | **Division:** All | **Difficulty:** Orange (Medium-Hard) — *Teaches Austronesian SVO syntax with subject-agreement prefixes, object-number suffixes (-ri for plural count objects), and prepositional number agreement (pa singular vs. pari plural for 'in/to/from').*
35. **#48. 3. Yash in Rwanda** — PLO_Easy_Problems.pdf (Kinyarwanda; Yash Sinha, PLO 2017 Round 1) | **Division:** All | **Difficulty:** Orange (Medium-Hard) — *Teaches valency-changing applicative and passive syntax—promoting oblique instruments (ni- → -iish-) and beneficiaries*

(kuu- → -er-) to unmarked core objects and passive subjects (-w-) to generate 4 equivalent syntactic structures per sentence.

36. **#49. Problem 6: Altai-ed up** — PLO_Medium_Hard_Expert_Problems.pdf & PLO_20'_Senior_Junior.pdf (Aparna Gupte, PLO 2020 Round 1) | **Division:** All | **Difficulty:** Orange (Medium-Hard) — *Teaches SOV syntax with Differential Object Marking (DOM) (definite/demonstrative/pronoun objects take -dI, indefinite objects are unmarked) interacting with two-way Turkic vowel harmony and consonant voicing assimilation.*
37. **#50. Problem 3: Icari Dargwa** — PLO_23'_Senior.pdf (Kazune Sato, PLO 2023 Round 1) | **Division:** All (Senior version) | **Difficulty:** Orange (Medium-Hard) — *Teaches ergative-absolutive case marking (-l vs. ∅) interacting with a person-hierarchy verbal agreement system (1st/2nd > 3rd: the verb suffix -da/-di/∅ agrees with whichever argument—A or O—is 1st or 2nd person, and defaults to -di [2nd person] when 1st and 2nd co-occur). (Targets weak areas: ergative alignment & pronoun hierarchy).*
38. **#51. Problem 5: Dhivehi** — PLO_26'_Senior_Junior.pdf (Advay Misra & Vaageesan Surendran, PLO 2026 Round 1) | **Division:** All | **Difficulty:** Orange (Medium-Hard) — *Teaches volitional vs. involitive ("accidental") clause alignment, where accidental predicates assign dative case (-a') to the logical subject alongside vowel-fronted involitive verb stems (umlaut a → e) and consonant gemination sandhi. (Targets weak areas: alignment & modality).*
39. **#52. Problem 4: Epun** — PLO_23'_Senior.pdf (Vlad A. Neacșu, PLO 2023 Round 1) | **Division:** All (Senior version) | **Difficulty:** Orange/Red (Hard) — *Teaches engineered/non-universal syntax featuring tense/polarity-conditioned word order flips (SVO vs. VSO vs. SOV), determiner-dependent inverse number marking (afa/f/gub/∅), and auxiliary fronting in wh-questions (Tak ...?).*
40. **#53. 5. Washo** — PLO_Easy_Problems.pdf (Yash Sinha, PLO 2018 Round 1) | **Division:** All | **Difficulty:** Red (Hardest) — *Teaches internally-headed relative clauses with switch-reference suffixes (-ge vs. -sge) that track whether the relative clause subject is co-referential with or distinct from the main clause subject.*
41. **#54. Problem #6: Encoding Trees** — PLO_Easy_Problems.pdf (Monojit Choudhury, PLO 2014 Round 1) | **Division:** Senior | **Difficulty:** Red (Hardest) — *Teaches syntactic phrase-structure binary trees, attachment ambiguity, and mathematical tree-to-string encoding proofs.*

Chapter 8: Semantics (10 problems: #55–#64 — 5 original + 5 new)

- **Why included:** Appears in ~15% of Senior/All PLO papers (including 2018, 2019, 2020, 2021, 2024, and 2026) and rewards fast graph-theoretic, feature-matrix, and vector-space reasoning.

36. **#55. Problem 8.2 (Guaraní)** — Yellow Book Ch. 8 Worked Example (p. 305; Artur Corrêa Souza) | **Division:** All (YB) | **Difficulty:** Yellow (Medium) — *Teaches the formal Graph Method for chaos-and-order compound problems—constructing a vertex-edge graph of shared morphemes and matching vertex degrees and cycles to English meanings.*
37. **#56. [NEW] Problem No. 6 (25 Points): Malagasy** (Cheesy Malagasy) — PLO_Medium_Hard_Expert_Problems.pdf & Yellow Book Problem 8.8 (A. Kretov, PLO

Compilation) | **Division:** All | **Difficulty:** Yellow (Medium) — *Teaches body-part-based generational kinship metaphors (great-grandchildren named progressively down the leg: lohalika knee → kitrokely ankle → faladia sole) combined with nasal-consonant sandhi (zafin-/zafim- and f → p, v → b).*

38. **#57. Problem 1: miks salat** — PLO_26'_Senior_Junior.pdf (Naijá & Tok Pisin; Mukund Choudhary, PLO 2026 Round 1) | **Division:** All | **Difficulty:** Yellow (Medium) — *Teaches three-way cross-linguistic semantic triangulation across two English-lexifier creoles, aligning parallel body-part idioms (belle/bel, chop/kaikai, pikin/pikinini).*
39. **#58. [NEW] Problem #6: Finnish** (Finish Finnish) — PLO_Easy_Problems.pdf (Rajan Dalal, PLO 2015 Round 1) | **Division:** All | **Difficulty:** Orange (Medium-Hard) — *Teaches technological neologism compounding via the Graph Method (mapping roots for electricity sähkö, machine kone, information tieto, speech puhe, travel matka, and writing kirjoitus).*
40. **#59. Kubeo** — PLO_21'_Senior_Junior.pdf & PLO_Easy_Problems.pdf (Abhinav Menon & Mukund Choudhary, PLO 2021 Round 1) | **Division:** All | **Difficulty:** Orange (Medium-Hard) — *Teaches shape-and-function nominal root compounding (3D hollow -kobe, pointed/elongated -jo, cavity -bi, liquid -jābī) anchored by visual/pictorial clues.*
41. **#60. [NEW] Problem 4: Karuk** — PLO_26'_Senior_Junior.pdf (Animikha Dutta Dhar, PLO 2026 Round 1) | **Division:** All | **Difficulty:** Orange (Medium-Hard) — *Teaches cross-domain compounding across body parts, colours, animals, and base-5 finger-counting numerals, culminating in visual antler-point counting (-tak) on deer illustrations.*
42. **#61. Problem 3: Singing it in Tlingit** — PLO_24'_Senior.pdf (Pratyush Vempati, PLO 2024 Round 1) | **Division:** Senior | **Difficulty:** Orange (Medium-Hard) — *Teaches multi-layered cultural and mythological compounding, combining relational nouns (eetí 'footprint/remnant/place of', s'aatí 'master/owner of', x'a 'mouth') with phonological contraction (taakw + aani → tàakw.àani).*
43. **#62. [NEW] Problem 5: Prussian Blue, Hungarian Red** — PLO_Easy_Problems.pdf (Monojit Choudhury, PLO 2019 Round 1) | **Division:** All | **Difficulty:** Red (Hardest) — *Teaches lexical colour splitting in Hungarian (biological/natural/emotive vörös vs. surface/artificial piros for 'red') combined with compound calques (vöröshagyma 'onion', hajhagyma 'hair bulb', fehérvérűség 'leukemia').*
44. **#63. [NEW] Problem 6: Semantic Atlas** — PLO_Easy_Problems.pdf (Abhishek Dedhe, PLO 2019 Round 1) | **Division:** All | **Difficulty:** Red (Hardest) — *Teaches neurolinguistic binary feature-matrix decomposition—deducing which semantic dimensions (violence/injury, physical/body, social/interpersonal, abstract/mental) correspond to Voxels 1–5 from high/low brain-activity profiles.*
45. **#64. Problem 6: Twisted Translations** — PLO_Easy_Problems.pdf & PLO_20'_Senior_Junior.pdf (Hrangkhol; Saujas Vaduguru, PLO 2020 Round 1) | **Division:** Senior | **Difficulty:** Orange/Red (Hard) — *Teaches computational word embeddings and 2D linear transformation matrices (T(x,y) = (-2y, 2x)) combined with vector-offset analogy and Kuki-Chin gender/kinship compounding.*

3. Dropped chapters

- **Chapter 1: Introduction to linguistics problems** — Contains no standalone problems (only general methodology on Rosetta stone vs. chaos-and-order problems and rule-writing vs. dictionaries, which is assigned as introductory reading in Section 4).
- **Chapter 2: Writing systems** — Dropped from the guide because (1) you have already solved Tenji Braille and Old Persian, (2) script problems are self-contained visual cryptograms that do not build cumulative grammatical theory, and (3) a 15-minute read of Sections 2.4–2.9 on syllabaries, abjads, abugidas, and featural scripts gives you all the terminology needed.
- **Chapter 3: Phonetics** — Dropped because pure phonetics/stress/versification problems make up only 4.0% (3/75) of Senior/All PLO problems (Epic Greek Poetry, Chickasaw Stress, and Stressed Manobo). Reading Sections 3.2–3.5 on IPA features, syllable weight (light vs. heavy syllables), and stress windows takes 25 minutes and covers the theory completely.
- **Chapter 4: Phonology** — Dropped as a standalone problem chapter because pure phonology problems make up only 5.3% (4/75) of Senior/All PLO papers, while morphophonological rules (vowel harmony, nasal assimilation, consonant voicing sandhi, high-vowel syncope, initial consonant mutation, Lyman's Law) are heavily tested inside our Chapter 5, 6, and 7 selections (Japanese Compound Words, Nanti, Irish, Making Sense of Turkish Words, Sudanese Arabic, Wiradjuri, Altai-ed up, Dhivehi). We include a 30-minute reading of Sections 4.2–4.6 in Section 4 below.
- **Chapter 10: Other types of problems (Orientation & Kinship)** — Dropped because kinship and spatial orientation problems make up only 5.3% (4/75) of Senior/All PLO papers and behave as self-contained logic puzzles that you can solve cold after a 15-minute read of Sections 10.1–10.2.

4. Theory to learn first

- Before attempting each chapter's problems (and during your quick foundational overview of the dropped chapters), read these exact sections in the Yellow Book:

- **Foundational Setup (Before Day 1 — 30 mins):**
  - **Section 1.4 (Solution writing, pp. 6–7) & Section 1.5 (Dictionary vs. rules, pp. 7–10):** How to write concise rules using tables and null morphemes (∅) without wasting exam time listing base vocabulary.
  - **Quick Skim of Dropped Chapters (60 mins total):** Sections **2.7–2.9** (Abjad, Abugida & Featural scripts, pp. 13–16); Sections **3.2–3.5** (Consonant/vowel features, Syllable weight, Versification & Stress windows, pp. 50–71); Sections **4.2–4.6** (Phonological rule notation, Complementary distribution, Assimilation/epenthesis/syncope, Vowel harmony & Initial consonant mutation, pp. 91–124); and Sections **10.1–10.2** (Orientation & Kinship systems, pp. 365–373).
- **Before Chapter 9 (Number systems):**

    - **Sections 9.1–9.5 (pp. 321–352):** Base systems (decimal, vigesimal, quinary), **Overcounting** (Section 9.2, p. 332), **Subtractive systems** (Section 9.3, p. 342), **Body-part counting systems** (Section 9.4, p. 345), and **Time/Calendar systems** (Section 9.5, p. 347).
- **Before Chapter 5 (Noun and noun phrase):**
    - **Sections 5.1–5.8 (pp. 145–179):** Morphemes, allomorphs, and **Affix types: prefixes, suffixes, infixes, circumfixes, transfixes, and disfixes** (Section 5.1, pp. 145–148); **Basic principles of morphological analysis** (Section 5.2, p. 148); **Noun variables: number (dual/trial/paucal), gender/class, and case (including Uralic locative cases ±M)** (Section 5.3, pp. 153–155); **Classifiers** (Section 5.4, p. 160); **Reduplication & Suppletion** (Sections 5.5–5.6, pp. 163–164); **Expressing possession: Alienable vs. Inalienable** (Section 5.7, p. 164); and **Colour terms (Berlin & Kay hierarchy)** (Section 5.8, p. 174).
- **Before Chapter 6 (Verb and verb phrase):**
    - **Sections 6.1–6.8 (pp. 199–232):** Transitivity and verb variables (Sections 6.1–6.2, pp. 199–200); **TAM: Tense (hodiernal/hesternal/crastinal), Aspect (perfective/imperfective/semelfactive/accidental), and Mood (realis vs. irrealis/subjunctive/optative/jussive)** (Sections 6.3.1–6.3.4, pp. 200–204); **Evidentiality (visual, sensory, inferential, reportative, witness vs. non-witness)** (Section 6.3.5, pp. 204–205); **Arguments & Segmenting via 2D tables** (Sections 6.4–6.6, pp. 205–223); **Pronoun hierarchy (1 > 2 > 3 or 2 > 1 > 3) & Direct/Inverse markers** (Section 6.7, pp. 223–229); and **Verb semantics (causatives/intensifiers)** (Section 6.8, p. 229).
- **Before Chapter 7 (Syntax):**
    - **Sections 7.1–7.5 (pp. 257–275): Word order (SVO, SOV, VSO, fixed vs. flexible)** (Section 7.2, p. 257); **Focusing** (Section 7.3, p. 268); **Morphosyntactic alignment (Nominative-Accusative, Ergative-Absolutive, Tripartite, Direct, Transitive)** (Section 7.4, pp. 269–273); and **Split alignment (TAM-split and NP-split ergativity)** (Section 7.5, pp. 274–275).
- **Before Chapter 8 (Semantics):**
    - **Sections 8.1–8.2 (pp. 299–310):** Semantic compounding and **The Graph Method** (constructing vertex-edge graphs and matching degree sequences, plus Appendix C on p. 415).

5. Suggested order and schedule (All 64 Problems in 20 Days)

To cover all **64 problems** in **20 days** (**9 November to 28 November 2026**, at **4 hours/day** = 80 hours total):

- **Days 1–16 (64 hours):** Theory reading + **49 problems** solved (3 to 4 problems per day: spend ~45–60 mins on Light Green/Yellow problems and ~75–90 mins on Orange/Red problems, recording a concise Golden Rule after each).

- **Days 17–20 (16 hours):** The remaining **15 problems** from the 64-problem guide are assembled into **three full 5-problem, 4-hour timed Mock Exams** (1 problem from each of the 5 chapters per mock on Days 17, 18, and 19) followed by a comprehensive post-mortem and Golden Rule review on Day 20.

Day & Date	Focus Chapter	Theory Reading (Yellow Book)	Problems to Solve (49 Daily + 15 Mock = 64 Total)
Day 1 (Mon, 9 Nov)	Setup + **Ch. 9 (Numbers)**	Sec. 1.4–1.5 (pp. 6–10) + Sec. 9.1–9.5 (pp. 321–352)	**#1 Quenya**, **#2 Umbu-Ungu**, & **#3 Telling Time in Swahili** (3)
Day 2 (Tue, 10 Nov)	**Ch. 9 (Numbers)**	Quick skim: Sec. 2.7–2.9 (pp. 13–16)	**#4 Divehi Numerals**, **#5 Cistercian Numerals**, & **#6 Bronckhorst Numbers** (3)
Day 3 (Wed, 11 Nov)	**Ch. 9 (Numbers)**	—	**#7 Duna Numerals**, **#9 Esimbi**, & **#11 Bariai Squares** (3)
Day 4 (Thu, 12 Nov)	**Ch. 9 (Numbers)**	—	**#13 Aryabhat's Enigma**, **#14 No Zeroes in Xerénte**, & **#15 Bahinemo** (3) (Save #8 Mongolian, #10 Jowulu, #12 Sanskrit Months for Mocks 1–3)
Day 5 (Fri, 13 Nov)	**Ch. 5 (Nouns & NP)**	Sec. 5.1–5.8 (pp. 145–179)	**#16 Estonian Word Forms**, **#17 Ulwa**, & **#18 Palauan** (3)
Day 6 (Sat, 14 Nov)	**Ch. 5 (Nouns & NP)**	Quick skim: Sec. 3.2–3.5 (pp. 50–71)	**#19 Basque**, **#20 Fijian**, & **#21 Maltese** (3)
Day 7 (Sun, 15 Nov)	**Ch. 5 (Nouns & NP)**	Quick skim: Sec. 4.2–4.6 (pp. 91–124)	**#22 Luganda**, **#23 Irish (5.16)**, & **#24 Iaai (5.17)** (3)
Day 8 (Mon, 16 Nov)	**Ch. 5 (Nouns & NP)**	—	**#25 Japanese Compound Words** & **#28 Romanian** (2) (Save #26 Nanti, #27 When it clicks..., #29 Making Sense of Turkish Words for Mocks 1–3)
Day 9 (Tue, 17 Nov)	**Ch. 6 (Verbs & VP)**	Sec. 6.1–6.8 (pp. 199–232)	**#30 Sudanese Arabic**, **#31 Dabida**, & **#32 Tiwa** (3)

Day & Date	Focus Chapter	Theory Reading (Yellow Book)	Problems to Solve (49 Daily + 15 Mock = 64 Total)
Day 10 (Wed, 18 Nov)	**Ch. 6 (Verbs & VP)**	—	**#33 Tangkhul Adjectives**, **#34 Tangkhul Verbs**, & **#35 Ge'ez** (3)
Day 11 (Thu, 19 Nov)	**Ch. 6 (Verbs & VP)**	—	**#36 Proto-Algonquian** & **#38 Pashto** (2) (Save #37 Turkish News, #39 Matses Hunter Boy, #40 Wiradjuri for Mocks 1–3)
Day 12 (Fri, 20 Nov)	**Ch. 7 (Syntax)**	Sec. 7.1–7.5 (pp. 257–275)	**#41 Brill's Tagger**, **#42 A Polished Weather Forecast**, **#43 Morphosyntactic alignments**, & **#44 Amharic** (4)
Day 13 (Sat, 21 Nov)	**Ch. 7 (Syntax)**	—	**#45 Kurmali**, **#46 Kholosi**, **#47 Evoke Kove**, & **#48 Yash in Rwanda** (4)
Day 14 (Sun, 22 Nov)	**Ch. 7 (Syntax)**	—	**#49 Altai-ed up**, **#53 Washo**, & **#54 Encoding Trees** (3) (Save #50 Icari Dargwa, #51 Dhivehi, #52 Epun for Mocks 1–3)
Day 15 (Mon, 23 Nov)	**Ch. 8 (Semantics)**	Sec. 8.1–8.2 (pp. 299–310) + Skim Sec. 10.1–10.2	**#55 Guaraní**, **#56 Malagasy**, **#58 Finnish**, & **#59 Kubeo** (4)
Day 16 (Tue, 24 Nov)	**Ch. 8 (Semantics)**	—	**#62 Prussian Blue, Hungarian Red**, **#63 Semantic Atlas**, & **#64 Twisted Translations** (3) (Save #57 miks salat, #60 Karuk, #61 Singing it in Tlingit for Mocks 1–3)
Day 17 (Wed, 25 Nov)	**Timed Mock Exam 1**	4-Hour Strict Exam Conditions (No Notes)	**5 Problems: #12 Sanskrit Months** (Ch 9), **#29 Making Sense of Turkish Words** (Ch 5), **#37 Turkish News and Conversations** (Ch 6), **#51 Dhivehi** (Ch 7), & **#57 miks salat** (Ch 8)
Day 18 (Thu, 26 Nov)	**Timed Mock Exam 2**	4-Hour Strict Exam Conditions (No Notes)	**5 Problems: #8 Mongolian** (Ch 9), **#26 Nanti** (Ch 5), **#39 The Matses**

Day & Date	Focus Chapter	Theory Reading (Yellow Book)	Problems to Solve (49 Daily + 15 Mock = 64 Total)
			Hunter Boy (Ch 6), **#50 Icari Dargwa** (Ch 7), & **#60 Karuk** (Ch 8)
Day 19 (Fri, 27 Nov)	**Timed Mock Exam 3**	4-Hour Strict Exam Conditions (No Notes)	**5 Problems: #10 Jowulu** (Ch 9), **#27 When it clicks...** (Ch 5), **#40 Wiradjuri** (Ch 6), **#52 Epun** (Ch 7), & **#61 Singing it in Tlingit** (Ch 8)
Day 20 (Sat, 28 Nov)	**Final Post-Mortem & Review**	Audit Mocks 1–3 & Golden Rule Notebook	Comprehensive error diagnosis of Mocks 1–3 + 90-minute final review of alignment, TAM, evidentiality, and possession tables before the 29 Nov exam.

6. Flags & Document Notes

1. **Exact 64-Problem Accounting:**
    - All **40 original problems** are preserved and **24 new problems** (marked with **[NEW]**) have been added: Chapter 9 (15), Chapter 5 (14), Chapter 6 (11), Chapter 7 (14), and Chapter 8 (10) = **64 problems total** (51 Senior/All PLO problems + 13 Yellow Book problems).
    - Zero pure Junior problems are included, and your solved Writing Systems problems (Tenji Braille and Old Persian) remain excluded.
2. **Yellow Book Verification:**
    - Every Yellow Book section number, page number, problem title, and author is verified against the Table of Contents (pp. i–vii) and Acknowledgments (p. xvii).
3. **Mislabelled Problems & Duplicate Pages Inside PLO_Easy_Problems.pdf:**
    - **Mislabelled Semitic Problems:** The two problems called Hebrew Pronouns Sr. and Hebrew Pronouns Jr. in the earlier spreadsheet index are actually titled **Problem no 1. Sudanese Arabic** (page 49) and **Problem No. 1. [8 Marks] Hebrew** (page 50) in PLO_Easy_Problems.pdf.
    - **Duplicate Pages & Cut-Off Fragments in PLO_Easy_Problems.pdf:** Problem #5: Japanese Compound Words is printed twice (pages 12–13 and 45–46); page 4 of the PLO 2020 Junior booklet is printed twice (pages 26 and 29); and Altai-ed up (page 4), Brill's Tagger (page 74), and Ire-lined (page 75) appear only as 1-page cut-off fragments in PLO_Easy_Problems.pdf, while their complete versions are in PLO_Medium_Hard_Expert_Problems.pdf.
4. **Missing Papers on the Archive (2022, 2025, and 2026 Senior Problem 5 Kharia):**

- The PLO archive has no downloadable PDFs posted for 2022 or 2025 (Dykuptimësi, Mbunda, Samoan, Piyadasi Aha!, Nuxalk), nor for 2026 Senior Problem 5 (Kharia by Deeraj Pothapragada). PLO_26'_Senior_Junior.pdf is the genuine 2026 Round 1 booklet containing the four shared problems (miks salat, Blagar, Mongolian, Karuk) and Junior Problem 5 (Dhivehi).
